Cord Algebra I, Learning in Context, 3rd edition

correlation to 2010 Alabama Course of Study: Mathematics Algebra I

Content Standard	Cord Algebra 1 Lesson(s)
NUMBER AND QUANTITY	
The Real Number System	
Extend the properties of exponents to rational e	exponents.
[N-RN1] 1. Explain how the definition of the	Covered in Common Core
meaning of rational exponents follows from	Algebra 1 Supplement Chapter
extending the properties of integer exponents to	Lesson 13.3b
those values, allowing for a notation for radicals	
in terms of rational exponents.	
[N-RN2] 2. Rewrite expressions involving	13.3, Covered in Common Core
radicals and rational exponents using the	Algebra 1 Supplement Chapter
properties of exponents.	Lessons 13.3a, 13.3b
Use properties of rational and irrational number	ers.
[N-RN3] 3. Explain why the sum or product of	Covered in Common Core
two rational numbers is rational; that the sum of	Algebra 1 Supplement Chapter
a rational number and an irrational number is	Lesson 1.1a
irrational; and that the product of a nonzero	
rational number and an irrational number is	
irrational.	
Reason quantitatively and use units to solve pro	oblems. (Foundation for work
with expressions, equations, and functions.)	
[N-Q1] 4. Use units as a way to understand	2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7,
problems and to guide the solution of multistep	7.2, 7.3, 7.4, 7.5
problems; choose and interpret units consistently	
in formulas; choose and interpret the scale and	
the origin in graphs and data displays.	
[N-Q2] 5. Define appropriate quantities for the	Used throughout the text.
purpose of descriptive modeling.	
[N-Q3] 6. Choose a level of accuracy appropriate	2.6, 2.7, and used throughout the
to limitations on measurement when reporting	Math Labs sections at the end of
quantities.	each chapter.
ALGEBRA	
Seeing Structure in Expressions	
Interpret the structure of expressions. (Linear, exponential, quadratic.)	
[A-SSE1] 7. Interpret expressions that represent	1.8, 10.1, 10.2, 10.3, 10.4, 10.5,
a quantity in terms of its context.	10.6, 10.7, 12.1, 12.2, 12.3,
	12.4, 13.3

	T	
[A-SSE1a] 7a. Interpret parts of an expression	1.8, 10.2, 10.2, 10.3, 10.4, 10.5,	
such as terms, factors, and coefficients.	10.6, 10.7, 12.1, 12.2, 12.3,	
	12.4, 13.3	
[A-SSE1b] 7b. Interpret complicated expressions	1.8, 10.1, 10.2, 10.3, 10.4, 10.5,	
by viewing one or more of their parts as a single	10.6, 10.7, 12.1, 12.2, 12.3,	
entity.	12.4, 13.3	
[A-SSE2] 8. Use the structure of an expression	1.8, 10.2, 10.2, 10.3, 10.4, 10.5,	
to identify ways to rewrite it.	10.6, 10.7, 12.1, 12.2, 12.3,	
to identify ways to rewrite it.	12.4, 13.3	
Write expressions in equivalent forms to solve p	,	
exponential.)	or objection (Quality area area	
[A-SSE3a] 9. Choose and produce an equivalent	5.6, 10.4, 11.3, 11.4, 11.5	
form of an expression to reveal and explain	, , , , , , , , , , , , , , , , , , , ,	
properties of the quantity represented by the		
expression.		
a. Factor a quadratic expression to reveal the		
zeros of the function it defines.		
b. Complete the square in a quadratic expression		
to reveal the maximum or minimum value of the		
function it defines.		
c Determine a quadratic equation when given its		
graph or roots.		
0 1		
d. Use the properties of exponents to transform		
expressions for exponential functions.		
Arithmetic With Polynomials and Rational Exp		
Perform arithmetic operations on polynomials.	T	
[A-APR1] 10. Understand that polynomials form	10.1, 10.2, 10.3, 10.4	
a system analogous to the integers; namely, they		
are closed under the operations of addition,		
subtraction, and multiplication; add, subtract,		
and multiply polynomials.		
Creating Equations		
Create equations that describe numbers or relationships. (Linear, quadratic,		
and exponential (integer inputs only); for Standa	rd 13, linear only.)	
[A-CED1] 11. Create equations and inequalities	3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 11.3,	
in one variable, and use them to solve problems.	11.4, 11.5, 11.6, 12.5	
Include equations arising from linear and		
quadratic functions, and simple rational and		
exponential functions.		
[A-CED2] 12. Create equations in two or more	4.3, 4.4, 4.5, 4.6, 4.7, 5.4, 5.5,	
variables to represent relationships between	5.6, 8.1, 11.1, 12.1	
quantities; graph equations on coordinate axes		
with labels and scales.		
Income with control		

[A-CED3] 13. Represent constraints by	8.1, 8.2, 8.3, 8.4, 8.5, 9.7
equations or inequalities, and by systems of	
equations and/or inequalities and interpret	
solutions as viable or non-viable options in a	
modeling context.	
[A-CED4] 14. Rearrange formulas to highlight a	3.3, 3.4, 3.5, 4.4 and used
quantity of interest, using the same reasoning as	through the Math Applications
in solving equations.	sections at the end of each
	chapter.
Reasoning With Equations and Inequalities	
Understand solving equations as a process of re	asoning and explain the
reasoning. (Master linear; learn as general princ	iple.)
[A-REI1] 15. Explain each step in solving a	3.1, 3.2, 3.3, 3.4, 3.5
simple equation as following from the equality	
of numbers asserted at the previous step, starting	
from the assumption that the original equation	
has a solution. Construct a viable argument to	
justify a solution method.	
Solve equations and inequalities in one variable	. (Linear inequalities; literal that
are linear in the variables being solved for; quadr	- · · · · · · · · · · · · · · · · · · ·
[A-REI3] 16. Solve linear equations and	3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 9.1,
inequalities in one variable, including equations	9.2, 9.3, 9.4, 9.5
with coefficients represented by letters.	
[A-REI4a] 17. Solve quadratic equations in one	11.2, 11.3, 11.4, 11.5, 11.6
variable.	
a. Use the method of completing the square to	
transform any quadratic equation in x into an	
equation of the form $(x-p)^2 = q$ that has the	
same solutions. Derive the quadratic formula	
from this form.	
b. Solve quadratic equations by inspection (e.g.,	
for $x^2 = 49$), taking square roots, completing the	
square and the quadratic formula, and factoring	
as appropriate to the initial form of the equation.	
Recognize when the quadratic formula gives	
complex solutions, and write them as $a \pm bi$ for	
real numbers a and b .	
Solve systems of equations. (Linear-linear and li	near-auadratic.)
[A-REI5] 18. Prove that, given a system of two	8.4, 8.5
equations in two variables, replacing one	,
equation by the sum of that equation and a	
multiple of the other produces a system with the	
same solutions.	
built bolutions.	

	1
[A-REI6] 19. Solve systems of linear equations	8.1, 8.2, 8.3, 8.4, 8.5
exactly and approximately (e.g., with graphs),	
focusing on pairs of linear equations in two	
variables.	
[A-REI7] 20. Solve a simple system consisting	Covered in Common Core
of a linear equation and a quadratic equation in	Algebra 1 Supplement Chapter
two variables algebraically and graphically.	Lesson 8.5a
Represent and solve equations and inequalities	graphically. (Linear and
exponential; learn as general principle.)	
[A-REI10] 21. Understand that the graph of an	4.3, 4.4, 4.5, 4.6, 4.7, 11.1, 11.2
equation in two variables is the set of all its	
solutions plotted in the coordinate plane, often	
forming a curve (which could be a line).	
[A-REI11] 22. Explain why the <i>x</i> -coordinates of	8.1, 8.2
the points where the graphs of the equations $y =$	
f(x) and $y = g(x)$ intersect are the solutions of the	
equation $f(x) = g(x)$; find the solutions	
approximately, e.g., using technology to graph	
the functions, make tables of values, or find	
successive approximations. Include cases where	
f(x) and/or $g(x)$ are linear, polynomial, rational,	
absolute value, exponential, and logarithmic	
functions.	
[A-REI12] 23. Graph the solutions to a linear	9.6, 9.7
inequality in two variables as a half-plane	
(excluding the boundary in the case of a strict	
inequality), and graph the solution set to a	
system of linear inequalities in two variables as	
the intersection of the corresponding half-planes.	
FUNCTIONS	
Interpreting Functions	
Understand the concept of a function and use fu	unction notation. (Learn as
general principle; focus on linear and exponentic	al and on arithmetic and
geometric sequences.)	
[F-IF1] 24. Understand that a function from one	5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 11.2
set (called the domain) to another set (called the	
range) assigns to each element of the domain	
exactly one element of the range. If f is a	
function and x is an element of its domain, then	
f(x) denotes the output of f corresponding to the	
input x . The graph of f is the graph of the	
equation $y = f(x)$.	
[F-IF2] 25. Use function notation, evaluate	5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 11.2
functions for inputs in their domains, and	
interpret statements that use function notation in	
terms of a context.	

[F-IF3] 26. Recognize that sequences are	Covered in Common Core
functions, sometimes defined recursively, whose	Algebra 1 Supplement Chapter
domain is a subset of the integers.	Lessons 14.1, 14.2, 14.3, 14.4
Interpret functions that arise in applications in	
exponential, and quadratic.)	terms of the context. (Linear,
[F-IF4] 27. For a function that models a	5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 11.2
relationship between two quantities, interpret key	3.1, 3.2, 3.3, 3.4, 3.3, 3.0, 11.2
features of graphs and tables in terms of the	
quantities, and sketch graphs showing key	
features given a verbal description of the	
relationship. Key features include intercepts;	
intervals where the function is increasing,	
decreasing, positive, or negative; relative	
maximums and minimums; symmetries; end	
behavior; and periodicity. [F-IF5] 28. Relate the domain of a function to its	515252545556112
	5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 11.2
graph and, where applicable, to the quantitative	
relationship it describes.	4.2, 4.3, 4.4, 4.5, 4.6, 4.7
[F-IF6] 29. Calculate and interpret the average	4.2, 4.3, 4.4, 4.3, 4.6, 4.7
rate of change of a function (presented	
symbolically or as a table) over a specified	
interval. Estimate the rate of change from a	
graph.	A
Interpret functions that arise in applications in	terms of the context. (Linear,
exponential, and quadratic.)	42 45 46 51 54 55 56
[F-IF7a] 30. Graph functions expressed	4.3, 4.5, 4.6, 5.1, 5.4, 5.5, 5.6,
symbolically and show key features of the graph,	11.2
by hand in simple cases and using technology for	
more complicated cases.	
a. Graph linear and quadratic functions, and	
show intercepts, maxima, and minima.	
b. Graph square root, cube root, and piecewise-	
defined functions, including step functions and	
absolute value functions.	
c. Graph exponential and logarithmic functions,	
showing intercepts and end behavior, and	
trigonometric functions, showing period,	
midline, and amplitude.	

[F-IF8a] 31. Write a function defined by an	5.6, 10.4, 11.2, 11.3, 11.4, 11.5,
expression in different but equivalent forms to	11.6, Chapter 11 Math
reveal and explain different properties of the	Applications
function.	ripplications
a. Use the process of factoring and completing	
the square in a quadratic function to show zeros,	
extreme values, and symmetry of the graph, and	
interpret these in terms of a context.	
b. Use the properties of exponents to interpret	
expressions for exponential functions.	
[F-IF9] 32. Compare properties of two functions	Covered in Common Core
each represented in a different way	Algebra 1 Supplement Math Lab
(algebraically, graphically, numerically in tables,	Chapter 5, Activity 4
or by verbal descriptions).	
Building Functions	
Build a function that models a relationship bety	
standards 33 and 34, linear, exponential, and que	
[F-BF1a] 33. Write a function that describes a	5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 11.2
relationship between two quantities.	
a. Determine an explicit expression, a recursive	
process, or steps for calculation from a context.	
b. Combine standard function types using	
arithmetic operations.	
[F-BF2] 34. Write arithmetic and geometric	5.1, Covered in Common Core
sequences both recursively and with an explicit	Algebra 1 Supplement Lessons
formula, use them to model situations, and	14.2, 14.3, 14.4
translate between the two forms.	
Build new functions from existing functions. (L	
and absolute value; for standard 36a, linear only	Í
[F-BF3] 35. Identify the effect on the graph of	4.6, 4.7, 11.2
replacing $f(x)$ by $f(x) + k$, $k f(x)$, $f(kx)$, and $f(x + k)$	
k) for specific values of k (both positive and	
negative); find the value of k given the graphs.	
Experiment with cases and illustrate an	
explanation of the effects on the graph using	
technology. Include recognizing even and odd	
functions from their graphs and algebraic	
expressions for them.	
[F-BF4a] 36. Find inverse functions.	Covered in Common Core
a. Solve an equation of the form $f(x) = c$ for a	Algebra 1 Supplement Lesson
simple function f that has an inverse, and write	5.5a
an expression for the inverse.	
Linear, Quadratic, and Exponential Models	
Construct and compare linear, quadratic, and exponential models and solve	
problems.	_
Construct and compare linear, quadratic, and exponential models and solve	

[F-LE1a] 37. Distinguish between situations that	
	Covered in Common Core
can be modeled with linear functions and with	Algebra 1 Supplement Lesson
exponential functions.	5.6a
a. Prove that linear functions grow by equal	
differences over equal intervals, and that	
exponential functions grow by equal factors over	
equal intervals.	
b. Recognize situations in which one quantity	
changes at a constant rate per unit interval	
relative to another.	
c. Recognize situations in which a quantity	
grows or decays by a constant percent rate per	
unit interval relative to another.	
[F-LE2] 38. Construct linear and exponential	5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 11.2
functions, including arithmetic and geometric	3.1, 3.2, 3.3, 3.4, 3.3, 3.0, 11.2
sequences, given a graph, a description of a	
relationship, or two input-output pairs (include	
reading these from a table).	
[F-LE3] 39. Observe, using graphs and tables,	5.6
that a quantity increasing exponentially	3.0
eventually exceeds a quantity increasing linearly,	
quadratically, or (more generally) as a	
polynomial function.	the situation they madel (Linear
Interpret expressions for functions in terms of	the situation they model. (Linear
and exponential of form $f(x) = bx + k$.	4.3, 4.4, 4.5, 4.6, 5.6, Chapter 4

[S-ID5] 44. Summarize categorical data for two	Covered in Common Core
categories in two-way frequency tables. Interpret	Algebra 1 Supplement Lesson
relative frequencies in the context of the data	7.2a
(including joint, marginal, and conditional	
relative frequencies). Recognize possible	
associations and trends in the data.	
[S-ID6a] 45. Represent data on two quantitative	7.3
variables on a scatter plot, and describe how the	
variables are related.	
a. Fit a function to the data; use functions fitted	
to data to solve problems in the context of the	
data. Use given functions or choose a function	
suggested by the context. Emphasize linear,	
quadratic, and exponential models.	
b. Informally assess the fit of a function by	
plotting and analyzing residuals.	
c. Fit a linear function for a scatter plot that	
suggests a linear association.	
Interpret linear models.	
[S-ID7] 46. Interpret the slope (rate of change)	7.3
and the intercept (constant term) of a linear	
model in the context of the data.	
[S-ID8] 47. Compute (using technology) and	7.3
interpret the correlation coefficient of a linear fit.	
[S-ID9] 48. Distinguish between correlation and	7.3
causation.	
Conditional Probability and the Rules of Proba	bility
Understand independence and conditional prob	pability and use them to
interpret data. (Link to data from simulations or	· experiments.)
[S-CP1] 49. Describe events as subsets of a	6.1, 6.3
sample space (the set of outcomes), using	
characteristics (or categories) of the outcomes, or	
as unions, intersections, or complements of other	
events "or," "and," "not").	
[S-CP2] 50. Understand that two events A and B	6.3, 6.5
are independent if the probability of A and B	
occurring together is the product of their	
probabilities, and use this characterization to	
determine if they are independent.
